ABOUT US

SUNCORE MINERALS & ENERGY (PTY) LTD.

Suncore Minerals and Energy (Pty) Ltd is a fully black-owned energy company and is run by a skilled and industry-experienced team with over 15 years combined expertise.

Suncore is located in an affluent suburb of western Ekurhuleni and is working towards opening a diesel depot that will store diesel, petrol, and jet fuel products. By doing so, the company will be adding value to the petroleum industry by allowing companies based in South Africa to source fuel directly from the South African market.

Suncore has strategic relationships with producers and suppliers such as Total SA, Sasol, Afrox, Fuel X, and Afrox Gasses that assure a sustainable and secure supply of petroleum products across the African continent. In addition to having several suppliers, Suncore will ensure no interruption in supply for its products, making it a reliable supplier. A key priority of the business is to ensure excellent customer service and to maintain relationships with suppliers and clients nationally and internationally.

DRIVEN BY:

-  Strong customer service.
-  Cost effectiveness & Competitive infrastructure.
-  Proudly marketing prominent petroleum brands.
-  A flexible and responsive delivery service designed to meet the needs of the small to medium sized business sector.

VISION & MISSION

Suncore has an ambition to go beyond only providing wholesale licenses and to buy one of the biggest storage facilities in Africa or the SADC region. This facility will be equipped to fill the gap in the shortages of diesel supply that most African economies experience, hence the term "liquid gold."

The business intends to operate multiple diesel depots that can transport large volumes both locally and internationally.

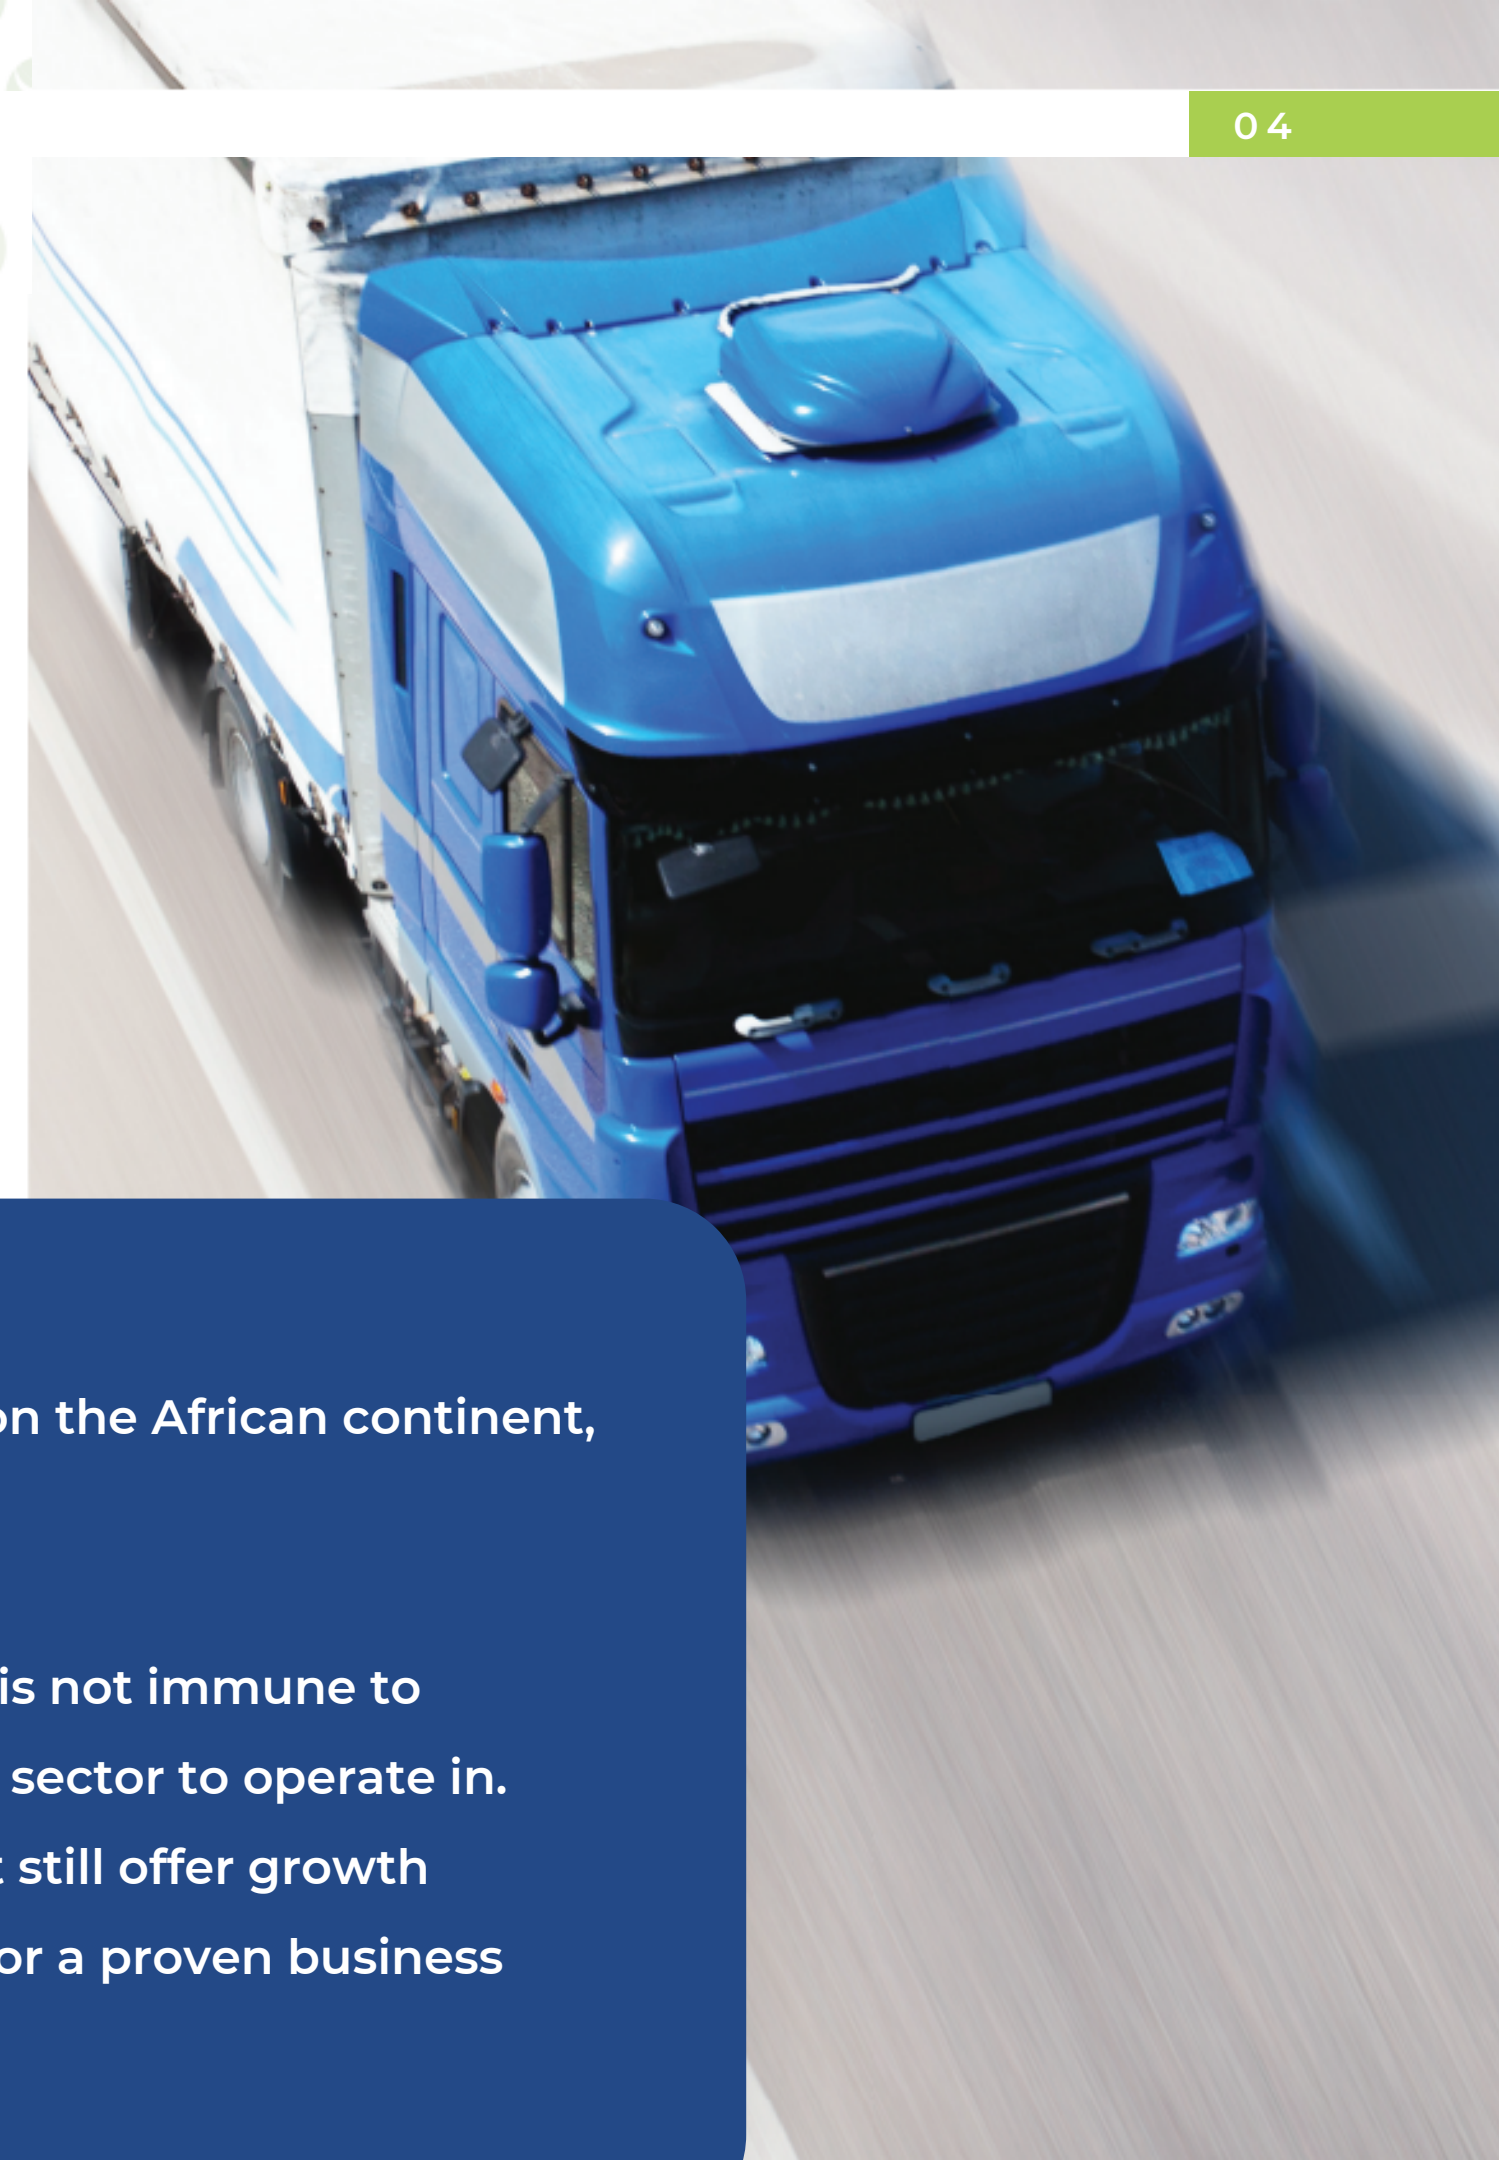

VALUES

-  Commitment to customer service.
-  Honest.
-  Respect.
-  Dedication to customer satisfaction.

MARKET OPPORTUNITY:

South Africa is the biggest consumer of fuel on the African continent, claiming more than 20% of the market share.

Like any other business, the fuel retail sector is not immune to economic headwinds; in fact, it is not an easy sector to operate in. However, it is by far one of the industries that still offer growth potential for entrepreneurs that are looking for a proven business model that is lucrative.

PRODUCTS

- Diesel 500ppm
- Diesel 50ppm
